REF: I&TF-0909-2019

THROUGH:

SD Revamp T21

The scope of work is as per the following:

1. Provide a mobile application tool and [voting console/response clicker] that will simplify the assessment scoring and voting process.
2. The tool must be linked to a dashboard and it should be easy, simplified in appearance and user friendly.
3. Voting tool should be dynamic, can be used with external parties and partners to be used for assessment and voting as well.
4. Voting tool must be flexible enough to be used for internal assessments in different type of meetings (i.e. workshops, assessments, meetings, planning, benchmarking, etc.)
5. Make the tool / application flexible to fit any types of internal and external assessments. (Multiple choice, yes or no, open question, survey, multiple calculations methods, analytics etc.)
6. Populate voting results on real time basis reflecting on the dashboard with the ability to show separate level of details as per administrator's requirement.
7. Generated information of the tool to be saved for easy extraction or report generation in Excel, Word and PowerPoint format.
8. Ability for the voting tool to tabulate results with different calculation options.
9. The voting tool should replace the "Risk Vote" application in DEWA's Smart Office.
